

Power Standards Lab XCT5 Current Transformer Interface Module

PQube Plug-in Modules and Accessories

Connects directly to voltage output current transformer secondary wires.

- Five channels of current monitoring
- External CT input ratio range: 1:1 to 1000:1
- Accuracy: $\pm 0.1\%$ rdg $\pm 0.1\%$ FS (plus uncertainty of external CTs)
- Adds current waveforms to PQ events
- Enables power consumption and energy monitoring
- Allows for earth current monitoring
- Crest factor typically 3.5 times rated input

Input:	P/N:
0.333 Volt	XCT5-0.333V-00
1 Volt	XCT5-1V-00
5 Volt	XCT5-5V-00
10 Volt	XCT5-10V-00
